

SNUAC Visiting Scholars Brown Bag Seminar Series, Fall 2015

The Strategy Research of Industry- university-research Cooperation regarding the Mobile Internet and the Smart Wearable Devices

Shaoqiang Fu

The major impetuses of Korean information technology development are enterprises, research institutions and consumers' support. The strategy of trinity makes these three parties cope with each other to tackle key technology problems after the releasing of government's policy.

China should grab some forward-looking and representative projects, promote the integrated development of information industry and advance the depth cooperation at national level in the mobile Internet, smart cities, the field of mobile wearable devices and so on between China and Korea.

Shaoqiang Fu, Ph.D in Economics, Associate Professor, comes from the international dissemination of research institute of Communication University of China.

Through the course of his over 17 year career, Dr. Fu has developed a high level of expertise as a Television Producer and received considerable recognition in Financial Channel of China Central Television.

Currently working as postdoctoral fellow in the International Scholar Exchange Fellowship by Korean Foundation for Advanced Studies. His correspondence emails: fushaoqiang@vip.sina.com
